HTML Get Started

To create an HTML document or a web page. To begin coding HTML

Step 1: Creating the HTML file

Open up your computer's plain text editor and create a new file.

Step 2: Type some HTML code

Start with an empty window and type the following code:

Example

```
<!DOCTYPE html>
<html lang="en">
<head>
    <title>A simple HTML document</title>
</head>
<body>
    <p>Hello World!<p>
</body>
</html>
```

Step 3: Saving the file

Now save the file on your desktop as "myfirstpage.html ".

To open the file in a browser. Navigate to your file then double click on it. It will open in your default Web browser. If it does not, open your browser and drag the file to it.
